

ONE TAP DOES IT ALL

Make a tap THAT DELIVERS
100°C BOILING WATER,
BUT MAKE IT **SAFE** THEY SAID.
COMPLETELY
Make it provide **FRESH**
FILTERED WATER.
MAKE IT PERFECT FOR MAINS.
COLD & HOT WATER. THEY SAID.
MAKE IT ENGINEERED IN
STAINLESS
STEEL
and make it
EASY TO INSTALL.
MAKE IT WONDERFUL

MAKE IT WONDERFUL

FRANKE

WATER AT ITS MOST *Wonderful*

New Omni from Franke is the one tap that delivers not only hot and cold mains water but also cold and boiling filtered water. Not nearly boiling water like many kettle taps, really boiling at a full 100°C. Nothing less will do to quicken up cooking and brew the perfect cup of tea. Omni's easy to fit in new or existing kitchens, safe to use and ultra reliable with a 3-year warranty. Omni works beautifully with existing plumbing too. Best of all, it's refreshingly affordable.

ONE TAP DOES IT ALL

The benefits
are *everywhere*

4-in-1 technology

Omni is the world's first mechanical 4-in-1 kitchen mixer tap, offering filtered boiling and filtered cold water, as well as the usual mains hot and cold.

Ultimate convenience

Instant boiling water lets you get meals underway in no time and offers the perfect cuppa at your fingertips. It even makes sterilising baby bottles quick and convenient.

Minimal maintenance

Omni is a complete system, including tap, boiler and under sink filter. The filter provides high quality drinking water and also protects the boiler from limescale build-up. Each filter lasts around 6 - 9 months and replacing the filter is as easy as changing a lightbulb.

True 100°C boiling water

Most 'boiling' tap systems only produce less than 98°C so hot drinks don't taste as good as they should. Omni delivers fully boiling 100°C water instantly for the perfect cuppa.

Easy installation

Virtually no tools and minimal plumbing skills are required for installation. The 'no tool' NutRunna® technology on the hoses allows for hand tightening. Omni can be fitted in as little as 2 hours in normal kitchens. Our patented filter housing has 2 flow outlets built in, resulting in less plumbing time.

Safety assured

Omni is safer than a traditional kettle in so many ways; there are no cords which can be pulled to avoid any nasty accidents as on a kettle. The childproof push-to-activate lever helps to keep boiling water away from little hands. The lever is also spring loaded to switch off instantly if any splashes occur.

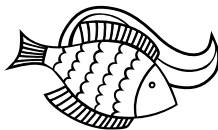

A child safety clip is provided for total protection from curious little hands or visitors to your home. All this and the patented chassis engineering means the tap is never too hot to the touch. It stays cool even when producing boiling water.

A full 3-year guarantee for total reliability

A 3-year manufacturer's warranty covers the complete system for your total peace of mind.

Exceptional aftercare

Our UK based advisors are always on hand to help. Filters tell you when they need replacing, and replacements are easy to order by phone or online.

We may have just made the
best tap in the world

ONE TAP DOES IT ALL

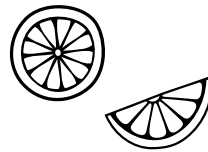

The elegantly designed hi-shine
finish of stainless steel hides
some truly *innovative
engineering*

Omni is easy to use, normal hot and cold water is dispensed through a conventional mixer lever. Pull the opposite lever forward for filtered cold water and push it back for boiling. The boiling lever itself boasts triple safety features including a push-and-turn activation function, a spring-loaded shut off and a unique child safety clip, ensuring it is difficult to accidentally turn on.

You can be sure that your filtered water remains fresh and safe to drink at all times, thanks to an innovative 'tube within a tube' design, which keeps the filtered supply entirely separate from normal mains water. The clever design also keeps the outside parts cool at all times. The filter itself is pretty smart too. Omni lets you know when it's time to change the water filter by the LED built into the body of the tap, so you know your filter is always doing it's job.

It's a versatile solution, suitable for left or right hand sinks. Omni is easy to fit to a standard 35mm sink hole, while its timeless elegance is equally at home in traditional or modern kitchens. The tap is fully reversible allowing you to position the boiling water function away from the sink bowl.

Pure *genius* in the kitchen

The Omni filter

With Omni, there's no need for expensive bottled water. The secret of Omni's beautifully pure, fresh tasting water is the dual-purpose filter cartridge. It provides chlorine/chloramine, sediment and lead free water, and because of its position in the system, it helps to reduce limescale build-up in the boiler.

The filter cartridge only needs to be changed on average every 6 - 9 months, depending on use. The tap's integrated LED tells you when a replacement filter is required. Replacement filters are simple to order by phone or online from our UK base, and fitting your new filter is as easy as changing a lightbulb.

The Omni boiler

Compact and convenient, the boiler can be easily fitted into a standard kitchen cabinet. The compact design hides a generous 4.2 litre capacity. That's enough for 8 mugs of tea or 2 pans of water. Empty the boiler tank and you're just 10 minutes away from the next tankful of boiling water.

The boiler has no special installation requirements, just a water supply and a 13 amp socket. Colour coordinated boiler connections make fitting quick and easy, while safety is ensured by a built in shut off valve.

Superbly insulated and efficient, the tank uses very little power to keep the water at 100°C. The boiler is compliant with new Ecodesign Directives, consuming approximately only 32 watts of electricity per year in standby mode, which equates to savings for you. At just a penny a cup, it's affordable to run as well as to buy.

ONE TAP DOES IT ALL

The Franke Omni 4-in-1 system is protected by the following patent applications GB1515295.2, GB1515293.7, EP15182884.5, US14/837,640, and in China.
